

## Race Studio 3 Release history

Version	Date	Change/additions
<b>3.24.02</b>	Oct, 5th 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ New icons availables: ECO, DPS and Wheel drive</li><li>▪ MXP Strada<ul style="list-style-type: none"><li>▪ Max 8 analog channels</li><li>▪ Max 1 digital output</li></ul></li><li>▪ Minor improvement in xrk to drk utility</li><li>▪ CAN2 Stream now saves: 'Silent' and '120 ohm' properties</li><li>▪ Fixed bug about saving configuration without an ECU protocol</li><li>▪ Minor bugs fixed</li></ul>
<b>3.24.00</b>	Oct, 1st 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Added MXP, MXP Strada management</li><li>▪ Added Can Output management for MXm</li><li>▪ Added mirror camera management on MXP/S/G</li><li>▪ Minor bugs fixed</li></ul>
<b>3.23.12</b>	Sep, 21st 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Managing of RS232 ECU protocols for Solo 2 DL, MXS 1.2, MXG 1.2 (firmware update is required)</li><li>▪ Upgrade of Live Measures feature</li><li>▪ By now channel name supports spacing</li><li>▪ Fixed bug about Protection Keys for protocol measures</li><li>▪ Fixed bug about creation of some math channels</li><li>▪ Minor bugs fixed</li></ul>
<b>3.23.08</b>	Aug, 24th 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Upgrade of web update functionality of ECU protocols</li><li>▪ From "Preferences" menu, in "Start RS3 Options" panel, it is now possible to inhibit ECU protocols update. Useful when we have to test some beta versions protocols</li><li>▪ From "Preferences" menu, "Advanced" item and "View ECU Protocols Updates History" it is now possible to view the release history of the ECU protocols updates</li><li>▪ Upgrade of Live Measure interface, as shown in the attached image</li><li>▪ Minor bugs fixed</li></ul>

## Race Studio 3 Release history

Version	Date	Change/additions												
<b>3.23.01</b>	Jul, 20th 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Management of MXm</li></ul>												
<b>3.22.00</b>	Jul, 17th 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Management of MXG 1.2</li><li>▪ Introduced the possibility to manage icons in MXS 1.2 and MXG 1.2</li><li>▪ Bug fix, while exporting/importing configurations among PCs with different RS3 install paths, the imported configuration could result 'corrupted'</li><li>▪ Bug fix, RS3 is back working on Windows XP</li><li>▪ Minor fixes</li></ul>												
<b>3.21.00</b>	Jul, 5th 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Managed new device: MXG 1.2</li><li>▪ New devices can manage icons</li></ul>												
<b>3.20.00</b>	Jun, 22nd 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Managed new devices: MXS 1.2 and MXS 1.2 Strada</li></ul>												
<b>3.19.01</b>	Jun, 7th 2018	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Added for Solo 2 DL device the possibility of enabling CAN bus 120 Ohm resistor</li><li>▪ Fixed bug about crash when loading ECU protocols in configuration for Solo 2</li><li>▪ Fixed bug about protocols web updating</li><li>▪ Fixed bug about user tracks management</li><li>▪ Status variables:<ul style="list-style-type: none"><li>▪ Fixed bug about enabling data memorization as logic channel</li><li>▪ Fixed bug about enabling/disabling status variable</li><li>▪ Fixed bug about 'Save As' feature that did not save status variables</li></ul></li></ul> <b>Analisis</b> <ul style="list-style-type: none"><li>▪ Fixed a couple of crashes in plot routines</li></ul> <ul style="list-style-type: none"><li>▪ Upgrade/Bug Fix:<table><thead><tr><th>Manufacturer</th><th>Model</th><th>Compatib.</th><th>Description</th></tr></thead><tbody><tr><td>LINK</td><td>CAN_BUS_BASE_LCC</td><td>All</td><td></td></tr><tr><td>LINK</td><td>CAN_500k_BUS_BASE_LCC</td><td>All</td><td></td></tr></tbody></table></li></ul>	Manufacturer	Model	Compatib. ## Race Studio 3 Release history

Version      Date  
**3.16.20**      Oct, 24th 2017

### Change/additions

#### Configuration

- New Pages added for MXG/MXS
- Fuel level management in odometers (now 'counters') page (requires new firmware, provided with sw installer)
- "Off Road" track type has been added
- The RS3 installer can be launched in silent mode, for possible batch installations
- Bug fix for a couple of crashes that could occur in live view with SmartyCamHD, in live measures, and while closing software
- Minor improvements

#### ECU stream released:

Manufacturer	Model	Compatib.	Description
BOSCH	DALLARA_F3_08	All	
HOLLEY	EFI	All	
ASTON MARTIN	CAN_HS	All	
ASTON MARTIN	CAN_LS	All	
SIMTEK	01X19	All	
EFI EUROPE	EURO_12_F3	All	
MECTRONIK	MKE7_R6_WSS	All	
HONDA	CAN_CBR250RR	All	
RENAULT	CLIO_R4_CUP	All	
SKODA	OCTAVIA_CUP_MS6	All	
SCS	DELTA_GDI4	All	
SCS	DIESEL	All	
SCS	PETROL	All	
SYVECS	LR_F88_CAN	All	
KTM	X-BOW	All	
KTM	X-BOW_GT4	All	
ARTIC CAT	WILD CAT	All	
BRP	SkiDoo 600RS G4	All	
BRP	CanAm SSV	All	
YAMAHA	YZZ 2016	All	ECU driver for up to 2016 models
YAMAHA	YZZ 2017	All	

#### Upgrade/Bug Fix:

Manufacturer	Model	Compatib.	Description
BMW	M235i	All	Fixed Fuel Raw channel
FIAT_ABARTH	CAN_STANDARD	All	Added Vehicle speed channel (FA_VEH_SPEED_2) for FIAT PUNTO 2008
HONDA	CIVIC_TYPE_R_FD2	All	Fixed temperature offset

## Race Studio 3 Release history

HYUNDAI	CAN	All	Added channels																							
PEUGEOT	308_TCR	All	Added gear channel																							
F88	F88_CAN	All	Added Ethanol content channel																							
KMS	MD35	All	Fixed Ignition BDTC channel's unit of measurement																							
POLARIS	RZR	All	Fixed RPM channel and added new channels																							
BRP	SkiDoo 600RS XS	All	Changed name from SKI_DOO_MXZ_600RS to SkiDoo 600RS XS																							

**3.16.00** Jun, 20th 2017

### Configuration

- The download from the Memory Module is now managed
- Improved the user information window in case of errors that might occur while saving a configuration
- The speed channels configuration window, when channels are used as angular speed, feature now the possibility of "deg/s" and "rad/s"
- Fixed bug that could generate a mistake in the EVOx configuration while switching from a dash to another one

#### ▪ ECU stream released:

Manufacturer	Model	Compatib.	Description
MAZDA	01L30MX5_ND_GEMS	All	Starting with 01L30 ECU firmware
MECTRONIK	MKE7_RACECAR_STD	All	

#### ▪ Upgrade/Bug Fix:

Manufacturer	Model	Compatib.	Description
MAZDA	MX5_ND_GEMS	All	Before 01L30 ECU firmware

**3.15.08** Jun, 16th 2017

### Configuration

- Fixed bug for which the CAN output feature couldn't be storing correct info about channels after closing the software

## Race Studio 3 Release history

Version	Date	Change/additions
<b>3.13.00</b>	Jan, 18th 2017	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ New features added:<ul style="list-style-type: none"><li>▪ ECU driver Builder</li><li>▪ GSP_POS_Accuracy channel is available for display and CAN output (new firmware 1.22.99 for MX family and EVO family is required)</li><li>▪ New RPM scales for 'Rally Page'</li><li>▪ Tire temperature sensor</li></ul></li><li>▪ Minor bug fixed</li></ul>
<b>3.12.15</b>	Dec, 6th 2016	<b>Download</b> <ul style="list-style-type: none"><li>▪ Fixed bug that could generate data shift of some channels only in case of multiple download</li></ul> <b>Configuration</b> <ul style="list-style-type: none"><li>▪ Bug fix: GPS Speed could not be selected from channels expander dropout</li></ul>
<b>3.12.14</b>	Dec, 2nd 2016	<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Fixed bug for which in some cases the slaves configuration, upon transmission, could not be forwarded to slave units</li><li>▪ Fixed crash in settings window that could happen for all devices, improved also settings filter to avoid useless parameters repetitions</li></ul> <b>Download</b> <ul style="list-style-type: none"><li>▪ Fixed management of test types during download, now the software correctly keeps last user choice</li><li>▪ Minor fixes in download window tooltips and in error messages management (messages could be erroneously shown more than one time)</li><li>▪ Fixed bug for which the csv exports in RS3 download could offer a low precision in timing</li><li>▪ Improved csv exports to manage also GPS position accuracy</li><li>▪ Fixed bug for which there could be few bad samples at the end of the drk xrk/drk/csv files for high frequency sampled channels</li></ul> <b>Tracks</b> <ul style="list-style-type: none"><li>▪ Minor fixes in nations management (i.e. Aruba)</li><li>▪ Minor fix in track creation window to allow a name change referring only to letters case (i.e. monza -&gt; Monza)</li><li>▪ Fixed bug for which tracks filter could not be saved and tracks list could not be correctly updated after a change in nations settings</li></ul>

## Race Studio 3 Release history

Page 12

Version	Date	Change/additions
<b>3.12.10</b>	Nov, 22nd 2016	<p><b>Configuration</b></p> <ul style="list-style-type: none"><li>▪ Improvement: in the download window the error message that is prompted in case of problems has been made more meaningful for determining what happened</li><li>▪ Fixed bug in download that could lead to crashes when exporting to MatLab format</li><li>▪ Fixed bug for which, during download, in case of big ".xrk" files, the conversion to ".drk" could lead to bad values in logged channels</li><li>▪ Some minor fixes (tooltips and drawing imperfections) in the download window in case of mov files download from SD or SmartyCam</li></ul> <p><b>Analisis</b></p> <ul style="list-style-type: none"><li>▪ Fixed bug for which the satellites number in analysis saturated to a maximum number of 20, while GPS08 receivers can go over that number due to the use of more constellations (GPS-Glonass) than the GPS05 (GPS only)</li></ul>
<b>3.12.06</b>	Nov, 11th 2016	<p><b>Download</b></p> <ul style="list-style-type: none"><li>▪ Fixed bug for which RS3 could show a warning message on max 100 MB download in wrong cases and other improvements</li></ul> <p><b>Tracks</b></p> <ul style="list-style-type: none"><li>▪ Faster tracks download from web</li></ul> <p><b>Configuration</b></p> <ul style="list-style-type: none"><li>▪ Fixed bug in alarm settings: it wasn't possible to manage colored measures</li></ul>
<b>3.12.00</b>	Oct, 25th 2016	<p><b>Download</b></p> <ul style="list-style-type: none"><li>▪ Improved data download speed: USB comm speed, data conversion from xrk (logged by devices) to drk (for RS2Analysis)</li><li>▪ Added possibility to merge several xrk files into one single drk file</li><li>▪ In download window now it's possible to skip automatic selection of sessions made of one single lap, like it was in RS2</li><li>▪ Fixed bugs that could lead to crashes in case some different output format (eg. MatLab or NI) was selected in download phase</li><li>▪ Automatic naming for downloaded xrk files now let users avoid automatic insertion of original file name and logger ID into file name</li></ul> <p><b>Tracks</b></p> <ul style="list-style-type: none"><li>▪ Fixed bug for which it was impossible to save a new track when it was open shaped and very long (longer than 16 km)</li></ul>

## Race Studio 3 Release history

Version	Date	Change/additions																																																																
		<ul style="list-style-type: none"><li>▪ Added possibility to modify an AiM track into a user track in case anyone would want to modify the track shape</li><li>▪ During track creation/modification now the RS3 better checks if the beacon position is compatible with the track shape loaded, and coordinates edit boxed better allow for decimal figures</li><li>▪ During track creation, upon request to users to share data with AiM, now the shape of all laps (instead of the shape of one single lap) is shared. This for AiM labs to have more data to release a better map</li></ul>																																																																
		<b>Configuration</b> <ul style="list-style-type: none"><li>▪ Fixed bug for which it was possible for users to enter channel names using non ASCII fonts</li><li>▪ Minor bug fixes in configuration management</li><li>▪ Added alert window to inform the user that replacement of original instrumentation cluster may disable some of the bike functions</li><li>▪ In channel settings window it is now possible to set also the short name</li></ul>																																																																
		<b>Analysis</b> <ul style="list-style-type: none"><li>▪ Bugfix in RS2Analysis to avoid the measure units change in potentiometer channels, that sporadically occurred to some customers</li></ul>																																																																
		<b>General</b> <ul style="list-style-type: none"><li>▪ Fixed some bugs for which the software could crash while closing and prevent a new instance from being run</li><li>▪ While closing the software the main window is kept open untill all internal memory cleanup is finished</li><li>▪ ECU stream released:</li></ul>

■ Upgrade/Bug Fix:

Manufacturer	Model	Compatib.	Description
SEAT_Sport	Leon_TCR	All	Add channels
MERCURY	PORT_OUTER_ENGINE	All	Change CAN bus setting
MERCURY	STARBOARD_OUTER_ENGINE	All	Change CAN bus setting
BOSCH	MS4_SP_T_40CSTX20	All	Change CAN bus setting
BOSCH	MS4_SP_T_40CSTX30	All	Change CAN bus setting
BOSCH	MS44_SP_T_44CSTX20	All	Change CAN bus setting

**3.08.11** Mar, 23rd 2016

- Fix on potentiometers management, the travels of which could result zeroed upon software or firmware updates
- Fix on user interface: previously it was possible to delete AiM tracks
- Fix on user interface: RS3 prompts a message box when trying to export a configuration being modified
- Fix on custom sensors: after renaming a custom sensor a RS3 restart was needed before being able to open the sensor again
- New tracks added
- Minor improvements

## Race Studio 3 Release history

Version	Date	Change/additions
<b>3.08.10</b>	Mar, 15th 2016	<ul style="list-style-type: none"> <li>Fixed bug in configuration when changed ECU protocol</li> </ul>
<b>3.08.09</b>	Mar, 14th 2016	<ul style="list-style-type: none"> <li>Fixed problem in Race Studio 3 executable file downloading from various browsers, using a new certificate</li> </ul>
<b>3.08.06</b>	Mar 3rd 2016	<ul style="list-style-type: none"> <li>New ECU drivers added (detailed separately)</li> <li>Fixed cases in which, after receiving a track from MyChron5, modifying it on the PC and transmitting it back to the MyChron5, the track was shown twice into the MyChron5 tracks menu</li> <li>Changed the interface of the "Upload to AiM" user dialog window</li> <li>In device configuration the numbering of bitfield values has been modified (from "0 -&gt; 7" to "1 -&gt; 8")</li> <li>Minor fixes into the track editing window in case of small tracks</li> <li>New tracks added or modified</li> <li>Bugfix: if one of the fields used for creating xrk file path included a trailing whitespace the download would abort without notifying user about possible reasons</li> <li>Changed UI name in RS3 for SD cards from SmartyCams, in order to avoid possible confusion with EVO5 SD cards</li> <li>RS3 startup speed has been improved</li> </ul>

<b>3.08.02</b>	Feb 19th 2016	<ul style="list-style-type: none"><li>Bitfields ECU channels management, user can now set alarms on single bit of channel. It requires firmware version 1.18.12 or later.</li><li>Fixed bug receiving-importing-cloning a configuration with math channels</li><li>Bugfix in web updates window, that could create random crashes</li><li>Bug fix for track length measure units while editing tracks</li><li>Track creation window: fixed difference between the GPS Manager and the RS3 software that used to introduce in RS3 difficulties in case of small kart tracks</li><li>RS3 now asks if the user wants to share new tracks also while downloading data, and warns that RS3 behaviour for sharing data with AiM can be modified using settings-&gt;upload icon menu</li><li>Modified the maximum number of decimal places for Lambda, milliSec and angle degree</li><li>Small issue fix for Wi-Fi communication in case of connection to existing network. For this issue it could happen that devices disappeared from the network to reappear few seconds later</li><li>Wi-Fi settings for virtualized Windows (MacOS case) have been made more visible to users</li><li>RS3 now warns users in case of a bad configuration in the device, and advises to send a new one</li><li>Modified call to system dialogs for file open in order to avoid giff format and have gif instead</li><li>New tracks added</li></ul>																												
<b>3.08.00</b>	Feb 11th 2016	<ul style="list-style-type: none"><li>EVO5 configuration</li><li>Possibility to insert custom text in download fields (for file name and path) and to customize "venue types" strings</li><li>Possibility to save data in matlab and csv and kml format while downloading</li><li>Improvements in Wi-Fi reliability for MyChron5</li><li>Improvements in tracks management</li></ul>																												

## Race Studio 3 Release history

Version	Date	Change/additions
<b>3.07.03</b>	Jan 7th 2016	<ul style="list-style-type: none"><li>Some more new race tracks: Guangdong, Shanghai kart, Lockarp</li><li>Bugfix: for MyChron5 RS3 features the new integrated GPSManager, for all other devices it runs the old GPSManager, while before the MyChron5 view was called for all devices</li><li>Bugfix: problems could arise with custom sensors (blank lines into the sensors database) while updating from 3.06.xx to 3.07.xx, now everything is correctly managed</li><li>Bugfix: while inserting ratios in "Precalculated Gear" math channel the resulting value could be wrong</li></ul>
<b>3.07.00</b>	Dec 23rd 2015	<ul style="list-style-type: none"><li>Track management for MyChron5</li></ul>
<b>3.06.20</b>	Dec 4th 2015	<ul style="list-style-type: none"><li>New WiFi support</li><li>Customizable logo</li><li>Revised menu system:<ul style="list-style-type: none"><li>Track display via menu</li><li>WiFi status</li></ul></li><li>System parameters editable via RS3 and menu</li><li>Improved and faster test list handling</li><li>Autorecording (standard conditions) will not be triggered by GPS speed alone, RPM or another speed required (avoid false positives)</li></ul>

- Released the following ECUs:

Manufacturer	Model	Compatib.	Description
LOTUS	Clusters 11 _ Exige Cup R	All	
MCLAREN	650S	All	
HELFTTEC	ECU 4.1	All	
PEUGEOT	RCZ_CUP	All	
ALFA ROMEO	4C	All	
HONDA	HDS_TAB_10	All	
HONDA	HDS_TAB_11	All	
BRP	SKI_DOO_MXZ_600RS	All	
YAMAHA	R6_MS_Retail	All	
GM	E67_PERF_ECU	All	
PROEFI	128	All	
MECTRONIK	MV_ECU_KIT_476	All	
MARELLI	SRT_CN2	All	
MARELLI	CAN_LMP3	All	
EMTRON	PAVLOTECH	All	

## Race Studio 3 Release history

Version      Date

Change/additions

AEM	INFINITYV.96CAN	All	
PEUGEOT	Funyo_sp05	All	
JAS	TCR	All	
TURNER	CUSTOM	All	

▪ Upgrade/Bug Fix ECUs:

Manufacturer	Model	Compatib.	Description
TOMS	DOME_FIA_F4	All	
MOTEC	M84	All	Add USER 2 channel defined as oil temperature
HALTECH	CAN_V2	All	Fix Bug related on Engine state channel
MARELLI	PROTO_V8	All	Update all channels list
SC	TYPHOON_TORNADO_V3	All	Fix Bug related on speeds channels

**3.05.02**

May 27th 2015

▪ MXG/MXS display pages improvements:

- New Rally Page
- Added possibility to show odometers and different time fields

▪ Minor bug fixed

▪ Released the following ECUs:

Manufacturer	Model	Compatib.	Description
MICROTEC	TM	All	
BOSCH	Tuner MS4 E46 M3	All	
FAST	XFI	All	
GM	C7_STINGRAY	All	
MECTRONIK	MK_E7	All	
FUEL_TECH	CAN	All	
MARELLI	FORMULA_MASTERS_CHINA_SERIES	All	
TEVES	MK60_ABS_MS	CAN2	
TEVES	MK60_ABS_STD	CAN2	

▪ Upgrade/Bug Fix ECUs:

Manufacturer	Model	Compatib.	Description
TOYOTA	GT86/SCION_FRS	All	Correction bug related to Water temperature offset
AUDI	CAN_PQ35_P5	All	Added oil temperature 2 channel
MARELLI	SRA_SRAE_SRT	All	Fixed bug related to ECU channels management

## Race Studio 3 Release history

Version	Date	Change/additions
<b>3.05.00</b>	May 11th 2015	<ul style="list-style-type: none"><li>▪ New web updates management: now it is possible to download device firmware even if no device is connected. Devices will be updatable once connected</li><li>▪ Now it is possible to show odometers and lap times information on the display and to remove undesired fields</li><li>▪ Improved start data recording management in order to avoid possible recording failure conditions due to lap channels and odometers</li><li>▪ New encryption management for the configuration of CAN2 and CAN1</li><li>▪ Added math channel to use precalculated gearings</li><li>▪ Introduced 'Clone' possibilities for configurations</li><li>▪ Fixed decimal figures management in analysis of drks from MXG-MXL2: now all places in which a channel is shown are coherent</li><li>▪ Improved autoselection management of xrk files in download window</li><li>▪ Improved test properties and forced values management in RS3 download window</li><li>▪ Improvements and fixes in management of deletion of alarms and math channels</li><li>▪ Minor improvements in user interface</li><li>▪ Minor improvements in the configuration of MXL2 display</li></ul>

- Released the following ECUs:

Manufacturer	Model	Compatib.	Description
ALFA ROMEO	4C	MXL2 MXS MXG	
TOMS	DOME_FIA_F4	MXL2 MXS MXG	

- Upgrade/Bug Fix ECUs:

Manufacturer	Model	Compatib.	Description
MBE	9A8998CAN	MXL2 MXS MXG	Correction bug related to 6th gear management
MBE	9A9CAN	MXL2 MXS MXG	Correction bug related to 6th gear management

## Race Studio 3 Release history

Version	Date	Change/additions
<b>3.04.08</b>	Mar 24th 2015	<ul style="list-style-type: none"><li>▪ Improvement: colors for devices icon in the upper part of the main window</li><li>▪ Improvement: in download window it is now possible to choose if to automatically select for download all files that still have to be downloaded</li><li>▪ Improvement: import/export management for custom sensors</li><li>▪ Improvement: better management of MXG page "Driver page 5 V2"</li><li>▪ Minor bugs fixing</li></ul>
<b>3.04.07</b>	Mar 12th 2015	<ul style="list-style-type: none"><li>▪ Improvement: on MXG (and coming MXS) it's now possible to use measure colors as an alarm</li><li>▪ Improvement: download page has been revisited to better manage fields like driver name, vehicle name, track name, etc... it's now possible to force their values to values different from those previously inserted</li><li>▪ Fix/improvement: it's now possible to configure units for GPS Speed, seen as a channel of the device</li><li>▪ Fix: channel names in math channels definition are now correctly matching</li><li>▪ Fix: "select folder" window is now working also in Windows XP</li><li>▪ Fix: upon selecting a sensor, then selecting a new sensor, then going back to the previous it could happen that some parameters were not properly managed</li><li>▪ Fix: upon creating a "calculated gear" math channel, the display part of the configuration could be missing it's presence</li><li>▪ Fix: coordinates channels can't now be used any more to create alarms</li><li>▪ Fix: total potentiometer travel is now better managed for angular potentiometers</li><li>▪ Fix: in some cases, selecting "no ECU" in a configuration created with an ECU, the new set was missed</li><li>▪ Released the following ECUs:</li></ul>

Manufacturer	Model	Compatib.	Description
STACK	TPMS_CONTROL_UNIT	All	Add this driver in can2 page selection

- Upgrade/Bug Fix ECUs:

Manufacturer	Model	Compatib.	Description
FIAT_ABARTH	CAN_STANDARD	All	Change ECU model name the last was: CAN
EFI_EUROPE	EURO_8	All	Update protocol for new EFI EURO8 firmware
BMW	BMW_MINI	All	Correct bug related to Steering angle channel and add gear and 2nd steer angle channels
